Hi Tom,

I send you our comments and crosswalk under a different email. I have hard copies but would you be able to send me copies of DEQ's comments electronically as well for my records?

Thanks
Mike

Do you have a digital copy of your (EPA) comments on the Workplan? If you sent them to me, I haven't the faintest where I might have stuck them.

Tom

Roux is supposed to have comments incorporated and next version sent to us by Oct. 30th and I have set Nov. 13th as our final review date. Hopefully that will be all, except for some minor details.

What is the timing on the revision of the RI/FS workplan? That is pretty key and do you have that electronically? Depending on timing I'm may try to draft some of Colleen's time.

Hi Tom,

We are pushing hard to have the AOC completed by the end of next month. We do have an internal call with management about Superfund alternative. (Depending on how that goes, we will want DEQ/State comments on that subject.)

I am presenting the Superfund process next month's community meeting, which starts at 5:30 -7:30 pm on November 12th, 2015. If DEQ has something they would like to present I can make time or if you can have someone available to help answer questions that may come up in regards to the states requirements/concerns, etc.

We also will be reviewing comment implementation into Glencore's (Roux's) RI/FS workplan. I am hoping DEQ can look at re-write and join us for meeting to finalize document. (That may just be a conference call.)

After that there will be NO meeting in December. Not sure after that. Actual work start up (well installs, sampling etc.) will probably not start until next spring.

That's what I know for now.

Hope this helps,

Mike

Mike,

Would you please send me your summary your thoughts on what's coming up on CFAC in the next 90 days. With the pedal to metal on Libby ROD, I need to find some resource to help with CFAC so I need an idea of whats coming down the pike for conference calls, meetings, and documents.

Thanks

tom
